Special Issue on Research Frontier in Computing, Networking and Communications

Guest Editorial—Special Issue on Research Frontier in Computing, Networking and Communicationsi
JianMing Wu and Ai-Chun Pang

A New Approach to Coding in Content-Based MANETs588
Joshua Joy, Yu-Ting Yu, Victor Perez, Dennis Lu, and Mario Gerla

Efficient and Reliable Communication in Wireless Relay Networks Using Joint Network Channel Fountain597
Ahasanun Nessa, Michel Kadoch, and Bo Rong

A Northbound API for QoS Management in Real-Time Interactive Applications on Software-Defined Networks ..607
Tim Humernbrum, Frank Glinka, and Sergei Gorlatch

Rapid Dissemination of Public Safety Message Flows in Vehicular Networks616
Izhak Rubin, Yu-Yu Lin, Andrea Baiocchi, Francesca Cuomo, and Pierpaolo Salvo

Regular Papers

Energy Balanced Clustering Algorithm in Large Scope WSN Based on Cooperative Transmission Technology627
Yang Jiang, Yiqian Yan, and Yang Yu

Fast and Distributed Power Control Algorithm in Underlay Cognitive Radio Networks.....634
Omar B. Abdulghafoor, Mahamod Ismail, Rosdiadee Nordin, and Musbah M. R. Shaat

Power Efficient Relay Selection and Diversity-Multiplexing Tradeoff in Two-way Relaying Networks644
Jie Yang and Xuehong Cao

An Enhanced AODV Route Repairing Mechanism in Wireless Ad-Hoc Sensor Network.....651
Zheng Zhang, Zhenbo Li, and Jiapin Chen
