

Journal of Communications

CONTENTS

Volume 20, Number 2, 2025

Cancelling Co-Channel Interference in Extremely Broadband Receivers	105
<i>Ara Abdulsatar Assim*, Aarno Pärssinen, and Timo Rahkonen</i>	
Advancing 5G Communication Systems: A Novel Method for OOB E Suppression in Filter-OFDM Waveforms ...	113
<i>Ammar Ahmed Falih*, Siti Barirah Ahmad Anas, Mohd Fadlee Bin A. Rasid, and Marsyita Binti Hanafi</i>	
Bandwidth Enhancement of HMSIW Antenna Using Half-Octagonal Ring Slot	131
<i>Andri Setyawan, Dian Widi Astuti*, Mudrik Alaydrus, and Yuyu Wahyu</i>	
Optimizing Underwater Communication via Integrating OFDM, FSO, and Fiber Optics in a Heterogeneous Networks Environments	141
<i>Satea H. Alnajjar* and Mahmood J. Ahmad</i>	
An IoT-Based Sensor Mesh Network Architecture for Waste Management in Smart Cities	153
<i>M. Belhiah* and M. El Aboudi</i>	
Compressive Channel Estimation for Hybrid Passive/Active IRS-Assisted mm-Wave MIMO Systems	166
<i>Hiba A. Alsawaf and Saad Ahmed Ayoob</i>	
A Review on Advancing Authentication Mechanisms: Integrating Physical Layer Security, Machine Learning, and Scalable Solutions	176
<i>Shen Qian</i>	
Interference Suppression Enabled by Reconfigurable Intelligent Surface for Simultaneous Wireless Information and Power Transfer Applications	184
<i>L. V. Thai, N. V. Cuong, T. V. Luyen*, and N. M. Tran</i>	
The Evolution of Mobile Communications: A Review about 5G Technologies and Future Directions	199
<i>Mohaimen Q. Algburi, Sazan Kamiran Al-Jaff, Ayman N. Muhi, and Mustafa Ghanim*</i>	
SASL-JTAG+: An Enhanced Lightweight and Secure JTAG Authentication Mechanism for IoT Systems with Diverse Devices	214
<i>Hisashi Okamoto*, Shaoqi Wei, Senling Wang, Hiroshi Kai, Hiroshi Takahashi, Yoshinobu Higami, Akihiro Shimizu, Tianming Ni, and Xiaoqing Wen</i>	
Legal and Communication Challenges in Smart Grid Cybersecurity: Classification of Network Resilience Under Cyber Attacks Using Machine Learning	221
<i>Tameem Hadi Fadhil, Mustafa I. Al-Karkhi, and Luttfi A. Al-Haddad*</i>	
Dedicated and Reuse Mode Device to Device Communication in Mission Critical Applications	229
<i>D. Makhija*, R. Bera, and S. Dhar</i>
