

Journal of Communications

CONTENTS

Volume 20, Number 3, 2025

A Vivaldi Antenna for Autonomous Vehicles in V2X Network.....	236
<i>Duong Thi Thanh Tu, Hoang Minh Duc, and Hoang Thi Phuong Thao*</i>	
A Comparative Study of Deterministic and Uncertain Classification for Area Coverage Approaches in Wireless Sensor Networks (WSNs)	244
<i>Adda Boualem</i>	
A Visible Light-Based Optical Camera Communication System for Text Data Transmission	261
<i>Mostafa A. R. Eltokhy, Mohamed Abdel-Hady, Ayman Haggag, Hisham A. Hamad, Tarek Hosny, and Ali M. El-Rifaie*</i>	
Optimizing Controller Placement in Software Defined Networking: A Capacitated and Latency-Aware Approach.....	272
<i>Gagan Deep Singh, Vikas Tripathi, Ankur Dumka, Tiansheng Yang, and Rajkumar Singh Rathore*</i>	
Benchmarking between 2 Proactive Handoff Models.....	282
<i>C. Hernández *, D. Giral, and F. Martínez</i>	
Preventing an RSU Impersonation Attack on Symmetric-Based Scheme in VANETs.....	291
<i>Eko Fajar Cahyadi*, Cahya Damarjati, Jafaruddin Gusti Amri Ginting, Bongga Arifwidodo, Alfin Hikmaturokhman, and Min-Shiang Hwang*</i>	
LoSCM: Logistic Regression with SCReAM via Machine Learning for Delay-Throughput Tradeoff.....	299
<i>Ahmed S. Jagmagji *, Haider D. Zubaydi, and Sándor Molnár</i>	
Wi-Fi 6 Data Transmission over a Low-Voltage Power Line Channel: Implementation and Analysis	315
<i>K. Ogunyanda*, O. O. Ogunyanda, A. D. Familua, T. Shongwe, T. G. Swart, and L. Cheng</i>	
Enhancing the Performance of Optimization Algorithms for Offloading Tasks in Mobile-Edge Computing Networks	324
<i>Yohanes Armenian Putra and Hilal Hudan Nuha*</i>	
Investigation of Spatial Prediction Methods for Atmospheric Environment Data Acquired Using Wireless Sensor Networks	331
<i>Keizo Usui, Sorato Mochizuki, and Nobuyoshi Komuro*</i>	
Innovative Health: How 6G and Wearable Devices are Shaping the Future	338
<i>Dang Van Anh, Nguyen Minh Quy, Abdellah Chehri, Nguyen Tien Ban, and Vu Khanh Quy*</i>	
A Compact Wide-Band Array Antenna for Ka-Band Applications	349
<i>Pavada Santosh, P. Ramesh, Chitambar Rao Karedla*, K. S. Chakradhar, M. Lakshmunaidu, and Harihara Santosh Dadi</i>	
Compressed Automatic Modulation Recognition Deep Learning Network Based on Bi-LSTM (CSBi-LSTM)	358
<i>Hossam M. Kasem, Haithem S. Khallaf, and Sherief Hashima*</i>
