Journal of Communications

CONTENTS

Volume 21, Number 5, 2026

Optimization of IRS-Assisted Wireless Communication Systems Using Stochastic Gradient Descent Algorithm (IRS-SGD) 593
Mahmoud Z. Iskandarani

Multi-Objective Evaluation of Classification Algorithms for Internet of Things (IoT) Systems and Edge Computing 606
Mouataz Idrissi Khaldi, Allae Erraissi, Mustapha Hain, and Mouad Banane*

Power and Energy Efficiency Analysis of Linearly Equalized Pulse Amplitude Modulated Cable Transmission 617
Christoph Lange and Andreas Ahrens*

Carrier-Frequency-Offset (CFO)-aware Deep Learning-based Orthogonal Frequency-Division Multiplexing (OFDM) Detection under a 60 GHz Clustered Delay Line Channel 631
*Noever Q. Saile and Lawrence Materum**

Minimum Viable Malware-image Resolution for ESP32-S3 Edge Triage 644
Phil Steadman, P. Jenkins, Rajkumar Singh Rathore*, and Chaminda Hewage*

Compact Wheelchair-shaped THz Multiple-Input Multiple Output (MIMO) Antenna with Enhanced Isolation for Ultra-high-speed 6G Networks 656
Md. Ashraful Haque, Fardin Ahmed Rifat, Mehidy Hasan, Jun-Jiat Tiang*, Narinderjit Singh Sawaran Singh, and Mahafujul Haq Riad*

Channel Estimation in Differential Chaos Shift Keying-based Multiple-Input Multiple-Output Space-time Block Coding Communication Systems Using Deep Learning 669
Navya Holla Kayyar and Sudha K. Lakshminarayana*

Digital Twin of a Wireless Channel Using Long Short-Term Memory (LSTM) 685
Vijayakumar Ponnusamy, Vasuki Andiappan, Vinodhini Manickaraj, and Malathi Devendran*

A Polar Code-based Audio Encryption Scheme for Secure Wireless Communication Systems 693
*Dinh Van Linh, Tran Duc Thiep, Pham Van Tiep, Pham Manh Tuan, and Pham Duy Phong**
