CONTENTS

Volume 10, Number 2, February 2015

- Single Antenna Interference Cancellation Algorithm Based on Lattice Reduction.....93
Yufeng Zhao, Yujian Cao, and Xuchu Dai
- Iterative Transceiver Design for Opportunistic Interference Alignment in MIMO Interfering Multiple-Access Channels101
Weipeng Jiang, Kai Niu, and Zhiqiang He
- ASVC: An Automatic Security Vulnerability Categorization Framework Based on Novel Features of Vulnerability Data.....107
Tao Wen, Yuqing Zhang, Qianru Wu, and Gang Yang
- A Quadratic Residue-Based Lightweight RFID Mutual Authentication Protocol with Constant-Time Identification117
Jingxian Zhou
- A Novel Collaborative Partner Selection algorithm Based on Nash Bargaining Game and Hungarian Method for Wireless Networks124
Shuanglin Huang, Jiaolong Wei, and Jianjun Tan
- Space-Time Diversity Schemes with Blind Channel Estimation for TH-PPM UWB MIMO Communications136
Dan Wang and Lei Yang
- Design and Implementation of System Under Test for LTE Protocol Conformance Testing.....145
Yin Chen, Zhizhong Ding, Dingliang Wang, and Teng Huang
