

# Journal of Communications

## CONTENTS

---

### Volume 16, Number 2, February 2021

- An FPGA Scalable Software-Defined Radio Platform for UAS Communications Research .....42  
*Angelo Manco and Vittorio U. Castrillo*
- Three Different Compact Elliptical Slot Ultra -Wide band Antennas for Wireless Communication Applications .....52  
*K. S Chakradhar and V. Malleswara Rao*
- Comparison of Path Loss Prediction Models for UAV and IoT Air-to-Ground Communication System in Rural Precision Farming Environment .....60  
*Sarun Duangsuwan and Myo Myint Maw*
- Self-Adaptive Rectenna with High Efficiency over a Wide Dynamic Range for RF Energy Harvesting Applications.....67  
*Eman M. Abdelhady, Hala M. Abdelkader, and Amr A. Al-Awamry*
- Limited-Search Chase Decoding Algorithm for LDPC Coded Underwater Acoustic Multiuser Channels .....76  
*Xingming Li, Zhiliang Qin, Yu Qin, Yuanhao Sun, Qidong Lu, and Xiaowei Liu*
